THE NEW CONSUMER PRICE INDEX

With effect from January 2013 ZIMSTAT is publishing the new Consumer Price Index (CPI) with new weights and a new classification in accordance with international guidelines. The use of a new classification of Individual Consumption by Purpose (COICOP) resulted in the creation of a new classification which resulted in coming up with 83 classes, 41 groups and 12 divisions while in the old classification there were 68 subgroups and 12 major groups. The number of items in the CPI basket has also been increased from 428 to 495.

Due to the reclassification that has been done, the sub-groups and major groups have been substituted by classes, groups and divisions.

The implementation of the COICOP classification is also part of the harmonisation project of Consumer Price Indices in different regions like the SADC region. All member states are supposed to adopt the new procedure to enable inter country comparisons of the CPI and the rate of inflation.

The indices prior to January 2013 were re-referenced to December 2012=100. The rates of inflation remain the same under different weight regimes as the relative magnitude of indices is maintained. The new weights are therefore applicable from January 2013 onwards.

LINKING THE 2008=100 WITH THE 2012=100 BASE AT ALL ITEMS LEVEL

Users who wish to continue using the old series (the Dec 2008=100 base) are advised to multiply the current all items index with a new base of (Dec 2012=100) by a conversion factor of 1.0290211. For instance if ZIMSTAT had continued with the old base (2008=100), the September 2016 all items CPI was going to be 98.797.
